

Introduction

Elliptical Mobile Solutions (“EMS”) manufactures and distributes unique, patented data center infrastructure products through a global partnership network of VARs, VADs and OEMs. The product line delivers turn-key, scalable, climate controlled computing environments with revolutionary efficiency and mobility features for virtually any IT environment.

First-to-Market Solution

EMS is first-to-market with **Micro-Modular Data Centers™**, a rack-level solution incorporating:

- **Closed Loop Cooling:** Up to 97% efficiency versus 30% industry average
- **Modularity:** Pay and deploy “as needed” on an incremental basis
- **Mobility:** Designed to be moved and shipped fully loaded
- **Fire Suppression:** Active suppression, 100% non-toxic, protective insulation
- **Water and Weather Protected:** Indoor or outdoor ready, NEMA 12/4
- **Enhanced Security:** Cyber Lock innovative system

Big Exciting Markets

Exceptional growth opportunities serving key movements in the IT industry: green/clean technology, high density computing, military applications, cloud computing, distributed data centers, remote office, and disaster recovery.

Sales have been achieved in eleven countries outside of North America, including Australia, Canada, England, India, Japan, Nigeria, South Africa, Singapore, Vietnam, Afghanistan, and Malaysia.

Based on Gartner forecasts ("Forecast: Data Centers, Worldwide, 2010-2015"), midsize, enterprise, and large data centers are likely to grow to more than 26,000 facilities by 2015.
